KAIA-OR · USE-CASE BRIEF

Executive and official awareness

A short, evidenced view of the events that concern senior people's places and trips, ordered by expected impact, with a second look at impersonation.

DOCUMENT ID	UCB-15-EXECUTIVE-AND-OFFICIAL-AWARENESS
VERSION	1.0
DATE	3 November 2026
AUDIENCE	Senior executives and officials, and the staff who support them

At a glance

Who it is for	Senior executives and officials who need short briefings about their places and trips, and the staff who support them.
Outcome	A personal picture for the executive or official, a shared site picture for their staff, a second look at impersonation, and Hey KAIA briefings with evidence.
Package	KAIA-OR Enterprise or Government

The challenge

Senior people need a short, evidenced view of the world events that concern them, not a stream of headlines. Their staff need to know which events touch the offices, venues and itineraries they support, and how well each report is corroborated before it goes into a briefing.

Senior people are also frequent targets of impersonation: messages that claim to come from colleagues, advisers or partners and contain requests for sign-in details or demands for money. And none of the support they receive should mean that their whereabouts become visible to others.

> Briefings for senior people should be short, evidenced and about their own places and trips, without exposing where they are.

What changes with KAIA-OR

A personal picture, ordered by what it means

Events that touch the executive's or official's own places and trips appear in their own KAIA-OR, ordered by expected impact, each with why it appears, its severity and its corroboration status.

A shared site picture for staff

The offices, venues and facilities that staff support appear in the organization's shared picture, with the events that touch them and the reason each one matched.

Hey KAIA briefings with evidence

By voice or text, in English, French, Turkish or Hebrew. A briefing summarizes the events that touch a place or trip and cites its evidence, which is checked before anyone sees it. On hazards, Hey KAIA relays the publisher's own guidance.

A second look at impersonation

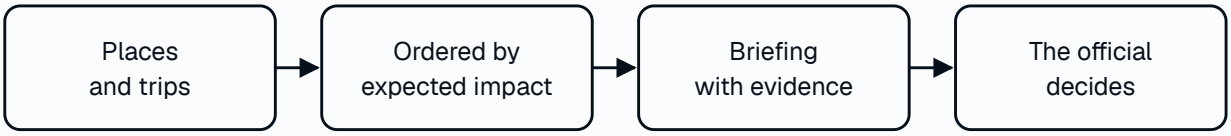

Paste a message that claims to come from a colleague or partner to see the warning signs KAIA-OR recognizes. Links stay unopened. You see what looks wrong, when the check can't tell, and a suggested next step, such as confirming through a channel you already trust.

What you see

Item	What it shows
An event in the personal picture	Category, severity, place, time window, confidence and corroboration status, its order by expected impact, and why it appears.
An event on a supported site	The same evidence, on the office, venue or facility it affects.
A Hey KAIA briefing	What the events mean for a place or trip, with the evidence they rest on.
A message check	The warning signs recognized in the text and a suggested next step.

How it works

A personal picture for the executive or official, and a shared site picture for the staff who support them.

1. The executive or official saves their own places and upcoming trips in their own KAIA-OR. Staff add the offices, venues and facilities they support to the shared picture.
2. When an event published by official and authoritative sources concerns one of those places or trips, it appears in the personal picture, ordered by expected impact and with why it appears.
3. When the official asks Hey KAIA for a briefing before a trip, the answer summarizes the events that touch it and cites its evidence.
4. When a message that appears to come from a colleague contains demands for money, the official or their staff paste it in and see the warning signs and a suggested next step.
5. The official decides, and checks with the colleague through a channel they already trust.

Privacy and control

- Staff see the sites they support, not the official's whereabouts.
- The official's exact location stays on their own device, and their own places and trips stay in their own KAIA-OR.
- Roles manage membership, not people. Membership never grants access to another member's messages, devices, location or saved places. These boundaries are enforced at the application layer.
- Nothing goes to cloud AI unless each person agrees first, and only that person can give that consent. Government organizations start with cloud AI off.

Honest boundaries

- KAIA-OR does not issue an all-clear for a place, a trip or a message.
- It does not provide travel assistance or evacuation services.
- Ordering by expected impact is a guide to what to read first, and each event shows why it appears.
- Coverage depends on what official and authoritative sources publish. Reports that cannot be corroborated are labelled as unconfirmed.

Editions and related use cases

Executive and official awareness is part of KAIA-OR Enterprise and Government. The executive or official keeps their own KAIA-OR, and their staff work from the organization's shared picture. KAIA-OR runs on iOS, iPadOS, macOS, Android phones, Android TV, Windows and the web, in English, French (Canada), Turkish and Hebrew. One account works on every platform, with the same features and the same privacy rules.

Related use cases

- Executives and high-profile individuals
- Diplomatic security
- Travel risk
